Richard Majekodunmi

richardmajek02@gmail.com | (763) 313-5802 | Brooklyn Park, MN 55443

Summary

Dynamic IT professional with 6+ years in client/server and web app administration. Over 4 years of leadership in AWS cloud computing, reducing project delivery time by 20% and boosting application scalability by 30%. Committed to leveraging AWS expertise to improve outcomes and eager to tackle new challenges.

Skills

- Scripting and Automation
- Cloud Infrastructure Design
- CI/CD Pipelines
- High-Quality Code Development
- System Integration
- Installing and Upgrading
- Collaboration and Communication
- Problem Solving and Troubleshooting
- Monitoring and Logging
- Software Development Life Cycle (SDLC)

Technical Skills

Linux, Git/GitHub, AWS, Azure, Jenkins, Nexus, Cloud Migration, CI/CD, Cloud Automation, Terraform, Agile, Bash, Docker, Kubernetes, Ansible, Cognos, SonarQube, SharePoint, Power Automate, Maven, Podman, Jira, GovCloud, Confluence

Experience

Cloud Engineer (Contract) | DR Financial Services | Houston, TX

03/2023 - Current

- Built and maintained automated, highly reliable image delivery, testing, and publication pipelines.
- Managed Linux-based infrastructures, ensuring 99.9% uptime.
- Created scalable multi-tier AWS infrastructure using Terraform.
- Conducted continuous monitoring and threat detection using AWS Guard Duty, leading to a significant reduction in potential security incidents.
- Work collaboratively with teammates to deliver Power Platform functionality county-wide.
- Designed and implemented highly scalable infrastructure using AWS, adhering to industry best practices.
- Utilized AWS services (EKS, ECS, ECR, VPC, CloudFormation, CloudWatch, S3, IAM, EC2, ELB, RDS, API Gateway).
- Managed CI/CD pipelines with Jenkins and GitHub Actions, reducing deployment time by 50%.
- Implemented cloud policies, decreasing unauthorized resource provisioning by 95%.
- Employed AWS Security Hub to aggregate and prioritize security findings, improving incident response times and overall security posture.
- Provide support for applications in the relevant environment, troubleshooting problems, performing upgrades, and implementing incremental enhancements.
- Developed common components for reuse across the organization, maintained documentation, demo applications, and reviewed pull requests.

DevOps Engineer | iCare Medical | Pearland, TX

09/2019 - 02/2023

- Engage in all stages of the Software Development Life Cycle (SDLC) for new applications.
- Employed Git/GitLab for version control, reducing code integration conflicts by 20%.
- Utilized Ansible for configuration management, reducing manual efforts by 30%.
- Implemented CI/CD pipelines into AWS with Jenkins.
- Developed code and scripts for Infrastructure as Code (IaC), configuration management, and automated incident resolution.
- Managed and optimized AWS cloud environments using AWS Organizations to establish a unified account structure and ensure compliance with organizational policies.
- Integrated Maven and SonarQube in Jenkins for code quality assurance.

- Collaborate with IT and other departmental developers to enhance overall solution deployment capabilities.
- Wrote high-quality code for new features and participated in design discussions.
- Reviewed code produced by other engineers and participated in design discussions.

Linux System Administrator | Data Service Group INC | Bear, DE
04/2018 - 09/2019
- Ensured consistent Linux server operations with 99.95% uptime.
- Enhanced network security, resolving 95% of identified vulnerabilities.
- Managed user access privacy and data integrity for 500+ users.
- Kept Linux servers updated, achieving 98% compliance with security updates.
- Configured, tested, and managed software installations, reducing incidents by 90%.

Data Management Specialist | Hutchinson Technology | Hutchinson, MN
03/2017 - 04/2018
- Established a robust network of data communities, enhancing collaboration by 40%.
- Implemented risk and compliance management strategies, reducing incidents by 95%.
- Demonstrated proficiency in Data Lineage, improving data traceability by 30%.
- Engaged with data owners and stewards to align data governance framework with their requirements.

Logistic Specialist | U.S. ARMY | Fort Drum, NY
02/2013 - 02/2017
- Maintained operational readiness of equipment worth $1.1M with a 98% rating.
- Directed a $104M supply program, achieving a 95% accuracy rate in stock management.
- Ensured precise order accuracy with a 99% rate.
- Validated requisitions and shipping orders, ensuring a 99% order accuracy rate.
- Handled and disposed of unused and outdated equipment, generating significant cost savings.

Education and Training

Master of Science in Project Management
Saint Mary's University of Minnesota | Minneapolis, MN | 2019

Master of Science in Administration of Justice and Security
University of Phoenix | Phoenix, AZ | 2017

Bachelor of Science in Criminal Justice
Colorado Technical University | Colorado Springs, CO | 2015

Certifications
- AWS Certified Solutions Architect - Associate
- Certified Kubernetes Administrator
- CompTIA Security+
- CompTIA A+
